PROFESSIONAL SUMMARY

Capital program delivery leader with 15+ years building the governance frameworks, program controls infrastructure, and delivery analytics systems that make large-scale programs visible, accountable, and measurable. At AltaGas, designed a three-tier governance structure - Strategic Leadership Council, Program Leadership Council, and Technical Advisory Council - across four subsidiaries, building the governance framework for structured delivery of AltaGas's enterprise maintenance programs. At TC Energy, owned a \$9M-\$15M annual delivery portfolio across six business functions: built the schedule compliance and variance analysis metrics from scratch giving the business unit its first structured visibility into contractual delivery performance, developed quantitative workload and capacity planning analytics, and built and mentored the PM team including defining the PM career ladder. Earlier at Keyera, contributed to one of the largest IT programs in company history - spanning 26+ facilities - and proposed the capability-based organizational model that grew the delivery function from 3 to approximately 10 people. Holds a BSc in Computer Science and fluency across operations, engineering, IT, and business stakeholders in capital-intensive industrial environments.

CORE COMPETENCIES

Delivery Governance Framework Design (Three-Tier, RASCI, Decision Rights)

Capital Program Analytics, Delivery Performance & Reporting Cadences

Portfolio Planning & Delivery (\$9M-\$15M+ annual portfolios)

Schedule Compliance, Variance Analysis & Program Controls (built from scratch)

PM Team Development & Career Ladder Design (11 PMs mentored)

Azure DevOps (5-Level Work Hierarchy, Traceability, Done Definitions)

Power BI Portfolio Dashboards & Executive Reporting

Investment Governance (Intake through Delivery Oversight)

Quantitative Workload, Capacity & Resource Planning Analytics

Executive Stakeholder Alignment (VP / GM / SteerCo)

Energy & Capital Infrastructure (Midstream, Upstream, Utilities)

SAP | Maximo (MAS) | Power Apps | Microsoft Fabric

WORK EXPERIENCE

AltaGas Ltd.

April 2025 - Present

Lead, Business Solutions | Delivery Planning & Governance · Calgary, AB

- Designed a three-tier EAM governance structure - Strategic Leadership Council, Program Leadership Council, and Technical Advisory Council - adopted across AltaGas, WGL, Semco Energy, and Petrogas; defined decision rights, RASCI accountability, and committee cadence to create structured delivery governance at enterprise scale
- Built and presented the business case for enterprise EAM governance to executive leadership - framing structured delivery capability as a prerequisite for optimizing AltaGas's maintenance programs, and connecting adoption gaps and technical debt to measurable enterprise delivery risk
- Developed the 2025-2027 EAM Capabilities Roadmap across four delivery workstreams and eight enterprise capability domains - Work Management, Asset Lifecycle, Supply Chain, Inventory Management, Operations Management, Health Safety & Environment, Planning & Scheduling, and Reliability & Maintenance
- Designed a decision-facilitation framework for executive leadership to navigate the MAS 9 migration - structured three complex binary decisions (hosting model, execution strategy, migration strategy) through a real-world analogy that made technical trade-offs accessible to non-technical stakeholders; drove SteerCo alignment on all three after program had been stalled for two years
- Established a delivery tracking framework in Azure DevOps defining a five-level work hierarchy (Epics → Features → User Stories → Test Cases → Defects), traceability standards, and outcome-based done definitions - providing consistent schedule and delivery visibility from strategic initiative through to tested deliverable
- Led a cross-functional delivery team through a period where demand tripled while team capacity dropped from 9 to 4 - maintained delivery continuity through structured intake governance and executive stakeholder alignment

TC Energy

August 2021 - September 2024

Liquids Portfolio Product Manager | Customer Engagement & Product Strategy · Calgary, AB

- Owned portfolio planning and delivery across a \$9M-\$15M annual initiative portfolio supporting Engineering, Operations, Supply Chain, Projects, Reliability, and Commercial functions - serving as the single accountable PM for the BU-level strategic roadmap
- Developed schedule compliance and delivery variance analysis from the ground up - gave the Liquids Business Unit its first structured visibility into contractual delivery performance, establishing program controls and measurement baselines where none previously existed
- Conducted quantitative workload analytics across the PM function - mapped initiative volume, complexity, and stakeholder demand by product line to identify capacity imbalances and build the analytical case for team restructuring decisions
- Built the PM function - defined the operating model, established the PM career ladder, and developed and influenced 11 Product Managers; elevated PM credibility with VP and General Manager-level leadership
- Designed an investment governance framework covering demand intake, business case evaluation, funding decisions, and delivery oversight - giving leadership consistent, structured visibility from initial business request through funded execution
- Served as Application Stream Lead on the TC Energy / Southbow spinoff - rationalized 2,000+ applications for a 10,000-person organization resized to 600 people; recommended Azure and Dynamics 365 over the planned AWS and SAP architecture; recommendation accepted as company platform direction

222529 Alberta Inc. (Independent Consulting Practice)

November 2019 - August 2021

Director, Business Analysis Consulting | Digital Transformation Programs

- Developed business cases, value frameworks, and prioritization models supporting investment decisions across a \$14M portfolio - including quantitative ROI, NPV, and cash flow analysis validated against departmental budget constraints
- Facilitated alignment between operational stakeholders and technical teams - bridging delivery reality and strategic objectives to ensure cross-functional ownership before programs launched

Keyera Corporation

July 2014 - November 2019

Senior Business Analyst / Program Lead | Enterprise Asset Management & Reliability Program · Calgary, AB

- Contributed to one of the largest IT initiatives in Keyera's history - an enterprise asset management and reliability transformation spanning 26+ facilities, targeting improvements in asset management maturity, work management practices, reliability processes, and organizational consistency
- Identified fragmented ownership across asset management capabilities and proposed a capability-based organizational model - bringing together Business Analysts, Functional Analysts, and Technical Analysts into a unified delivery function; leadership implemented the model, which grew from 3 to approximately 10 people
- Led requirements gathering and future-state process design across work management, reliability, and asset lifecycle - facilitating cross-functional workshops with Operations, Engineering, Maintenance, Reliability, and IT stakeholders

Team Lead, Maximo Support

2012 - 2014

- Led the Maximo support function - established intake, prioritization, and escalation processes that improved delivery visibility and service performance across business and technical teams

Shell Canada Ltd.

2012 - 2013

Service Operations Management Analyst

- Led service management improvement initiatives contributing approximately \$90K in annual cost savings; developed KPI frameworks and performance reporting to support operational decision-making and delivery improvement

Husky Energy

2012

Software Developer

- Designed and developed an internal work management application for a GIS team in C# - full delivery from requirements through deployment
