PROFESSIONAL SUMMARY

Portfolio product leader with 15+ years managing enterprise platform portfolios inside the industries InteleX serves - energy infrastructure, industrial operations, and asset-intensive environments where EHS compliance is a first-class design requirement, not an afterthought. Owns the full portfolio lifecycle: strategy, roadmap, investment governance, trade-off decisions, and performance measurement across multiple product lines simultaneously. Experienced player/coach who builds PM functions from the ground up, defines PM operating models and career ladders, and develops product managers while maintaining strategic ownership of the portfolio. At TC Energy, served as the single portfolio PM accountable for a \$9M-\$15M annual technology portfolio spanning six business functions - Engineering, Operations, Supply Chain, Projects, Reliability, and Commercial - building the investment governance framework from blank page and maturing the PM function's credibility with VP and General Manager-level leadership. At AltaGas, owns a product portfolio spanning eight enterprise capability domains including Health Safety & Environment, where HSE regulatory requirements govern product design decisions across four subsidiaries. Holds a BSc in Computer Science, enabling direct engagement with engineering and architecture teams without a translation layer.

CORE COMPETENCIES

Product Portfolio Strategy & Multi-Year Roadmaps

Player/Coach PM Leadership & PM Function Development

EHS / EHSQ Domain - Energy Operations, Regulatory Compliance (AER, CER, HSE)

Cross-Product Trade-off Decisions & Investment Prioritization (RICE/WSJF)

Investment Governance & Portfolio Budget Management (\$9M-\$15M+)

Enterprise B2B Software & Commercial Platform Strategy

PM Career Ladder Development & Team Coaching

Executive Stakeholder Alignment (VP / GM / C-Suite / SteerCo / Board)

Cross-Functional Leadership (Engineering, UX, Sales, Marketing, Customer Success)

Product Portfolio Health Metrics & Reporting

Agile / Scrum Delivery Across Multiple Workstreams

Business Case Development & Financial Modeling (ROI, NPV)

Azure DevOps | Power BI | Power Apps | SAP | Maximo / MAS

WORK EXPERIENCE

AltaGas Ltd.

April 2025 - Present

Lead, Business Solutions | Portfolio Product Strategy · Calgary, AB

- Owns a product portfolio spanning eight enterprise capability domains - Work Management, Asset Lifecycle, Supply Chain, Inventory Management, Operations Management, **Health Safety & Environment**, Planning & Scheduling, and Reliability & Maintenance - across AltaGas, WGL, Semco Energy, and Petrogas
- Defined a 3-year product capabilities roadmap governing the enterprise platform program - aligning priorities, delivery sequencing, investment decisions, and accountability across four subsidiaries and multiple functional stakeholders
- Designed a three-tier product governance structure (Strategic Leadership Council, Program Leadership Council, Technical Advisory Council) with defined decision rights, operating cadence, and executive oversight - adopted as the investment governance model across the organization
- Built and presented the business case for portfolio governance to executive leadership - connecting delivery capacity gaps, technical debt, and platform adoption risk to measurable enterprise risk; secured organizational commitment to governance restructuring
- Led a cross-functional product delivery team through a period of tripled demand and halved capacity - maintained delivery quality, roadmap discipline, and executive confidence through structured intake governance and prioritization
- Defined product adoption metrics and presented portfolio health reporting to executive leadership - linking platform underperformance to organizational, technical, and process root causes requiring investment response

TC Energy

August 2021 - September 2024

Liquids Portfolio Product Manager | Customer Engagement & Product Strategy · Calgary, AB

- Served as the single portfolio PM accountable for the entire Liquids Business Unit's technology portfolio - a \$9M-\$15M annual investment spanning Engineering, Operations, Supply Chain, Projects, Reliability, and Commercial product lines; individual product managers owning specific lines operated within and reported into the portfolio-level strategy
- Built and matured the Product Management function for the Liquids Business Unit - defined the operating model, established portfolio prioritization discipline, built the PM career ladder, influenced 11 Product Managers, and elevated the function's credibility with VP and General Manager-level leadership
- Designed an investment governance framework from blank page - defined intake SLAs, prioritization criteria (strategic alignment, regulatory urgency, operational risk, resource constraints), business case standards, funding thresholds, escalation paths, and reporting cadences; gave the organization its first consistent visibility from demand intake through funded execution
- Built a behavioral analytics model on product adoption data - discovered that zero-ticket areas had access barriers and systemic distrust rather than healthy adoption; findings changed how IT leadership measured and invested in platform health across the organization
- Served as Application Stream Lead on the TC Energy / Southbow spinoff - rationalized 2,000+ applications scoped for a 10,000-person organization to fit a 600-person company; evaluated planned AWS and SAP architecture and recommended migration to Azure and Dynamics 365; recommendation accepted as company platform direction
- Partnered with Directors, General Managers, and Vice Presidents across five functions to evaluate, prioritize, and align competing portfolio investments - making cross-product trade-off decisions against strategic objectives, regulatory requirements, and resource constraints

222529 Alberta Inc. (Independent Consulting)

November 2019 - August 2021

Director, Business Analysis | Digital Transformation Programs · Calgary, AB

- Built portfolio intake and evaluation frameworks for digital transformation investments - defined prioritization models, business case standards, and investment governance criteria across a \$14M portfolio
- Conducted financial modeling (ROI, NPV, cash flow) for portfolio investment decisions - validated projected value against budget constraints and strategic fit
- Facilitated alignment between operational stakeholders and technical delivery teams - defining scope, success criteria, and cross-functional ownership before programs launched

Keyera Corporation

July 2014 - November 2019

Senior Business Analyst / Program Lead | Enterprise Asset Management & Reliability · Calgary, AB

- Identified fragmented ownership across product and platform capabilities and proposed a capability-based organizational model - brought together Business Analysts, Functional Analysts, and Technical Analysts into a unified product function; leadership implemented the model and it grew from 3 to approximately 10 people
- Designed role definitions, team operating model, and accountability frameworks - establishing how demand entered the function, how the backlog was prioritized, and how product outcomes were measured
- Mentored Business Analysts and practitioners in stakeholder engagement, requirements, and facilitation - building product capability across the team
- Led requirements gathering and future-state process design across work management, reliability (defect management, failure identification), and asset lifecycle - in a heavily regulated operational environment (AER, CER) where HSE compliance governed design decisions across 26+ facilities

Team Lead, Maximo Support

2012 - 2014

- Led the product support function; designed intake, prioritization, and escalation processes; built field operations relationships that transformed platform trust and adoption

Shell Canada Ltd.

2012 - 2013

Service Operations Management Analyst

- Built KPI frameworks and performance reporting for service operations; identified improvements contributing approximately \$90K in annual cost savings

EDUCATION

Bachelor of Science, Computer Science

University of Manitoba

Certificate, Product Management
