PROFESSIONAL SUMMARY

Product strategy leader with 15+ years owning multi-year roadmaps, product vision, and full product lifecycle - from discovery and stakeholder validation through delivery and adoption measurement - across enterprise platforms in operational-complexity industries. At AltaGas, owns the 2025-2027 EAM Capabilities Roadmap governing eight enterprise capability domains and four subsidiaries, defining product vision, investment sequencing, and delivery priorities across a multi-workstream program. At TC Energy, served as the single PM accountable for a \$9M-\$15M annual product portfolio spanning six business functions - built the PM operating model from blank page, established PM career ladder, and developed 11 Product Managers. Brings a discovery-first discipline: separates real product problems from stated requests, defines success criteria before resources are committed, and validates product decisions through behavioral data rather than assumptions. Deep experience translating operational complexity into product requirements for buyers who manage large, regulated infrastructure environments. Holds a BSc in Computer Science.

CORE COMPETENCIES

Multi-Year Product Vision & Strategy (B2B Enterprise, Operational Complexity Industries)

Full Product Lifecycle (Discovery → Strategy → Roadmap → Delivery → Adoption)

Agile Product Ownership & Backlog Management

Customer Discovery & Stakeholder Validation (VP/GM/Director-level buyers)

Product Portfolio Management (\$9M-\$15M+ annual investment)

PM Team Development, Career Ladder Design & Coaching (11 PMs mentored)

Product Adoption Metrics, Behavioral Analytics & Health Reporting

Launch Readiness & "Ecosystem Ready" Cross-Functional Delivery Criteria

Executive Stakeholder Alignment (VP / GM / C-Suite / SteerCo)

Investment Governance & Business Case Development (ROI, NPV)

Azure DevOps | Power BI | Power Apps | SAP | Maximo (MAS)

WORK EXPERIENCE

AltaGas Ltd.

April 2025 - Present

Lead, Business Solutions | Product Strategy · Calgary, AB

- Owns multi-year product vision and strategy across eight enterprise capability domains - Work Management, Asset Lifecycle, Supply Chain, Inventory Management, Operations Management, Health Safety & Environment, Planning & Scheduling, and Reliability & Maintenance - governing a four-subsidiary enterprise program
- Defined and drove three binary product decisions (hosting model, execution strategy, migration strategy) through executive SteerCo using a structured decision-facilitation framework - reached product direction alignment after program had been stalled for two years
- Designed a three-tier product governance structure (Strategic Leadership Council, Program Leadership Council, Technical Advisory Council) with defined decision rights, operating cadence, and executive oversight - adopted as the investment governance model across AltaGas, WGL, Semco Energy, and Petrogas
- Operationalized a delivery framework in Azure DevOps defining a five-level work hierarchy with traceability standards and outcome-based "ecosystem ready" launch criteria - providing consistent launch readiness signal from strategic initiative through to tested deliverable
- Defined product adoption metrics and presented portfolio health reporting to executive leadership - linking platform underperformance to organizational, technical, and process root causes requiring product investment response
- Led a cross-functional product delivery team through tripled demand at half capacity - maintained roadmap discipline and executive confidence through structured intake governance and transparent prioritization

Liquids Portfolio Product Manager | Customer Engagement & Product Strategy · Calgary, AB

- Served as the single PM accountable for the entire Liquids Business Unit's product portfolio - \$9M-\$15M annual investment across six product lines; built and owned the multi-year capability roadmap and investment strategy governing what got built
- Defined product vision and strategy for six capability domains - led structured discovery with Directors, General Managers, and Vice Presidents across five business functions to separate real product problems from stated requests, validate priorities, and align investment decisions
- Built a behavioral analytics model on product adoption data - discovered that zero-ticket areas had access barriers and systemic distrust rather than healthy adoption; product findings changed how leadership measured and invested in platform health across the organization
- Developed commercial delivery performance metrics from the ground up - gave the Liquids BU its first structured visibility into product delivery performance and schedule compliance, establishing baseline product health measurement where none previously existed
- Built the PM function - defined the operating model, PM career ladder, and intake governance; developed and influenced 11 Product Managers; elevated PM credibility with VP and General Manager-level leadership
- Served as Application Stream Lead on the TC Energy / Southbow spinoff - rationalized 2,000+ applications for a 10,000-person organization resized to 600 people; recommended Azure and Dynamics 365 over the planned AWS and SAP architecture; product architecture recommendation accepted as company platform direction

222529 Alberta Inc. (Independent Consulting Practice)

November 2019 - August 2021

Director, Business Analysis Consulting | Digital Transformation Programs

- Defined product vision and feasibility for digital transformation investments across a \$14M portfolio - developed business cases, value frameworks, and prioritization models supporting go/no-go investment decisions
- Facilitated cross-functional alignment between operational stakeholders and delivery teams - ensuring product scope, success criteria, and ownership were defined before resources were committed

Keyera Corporation

July 2014 - November 2019

Senior Business Analyst / Program Lead | Enterprise Asset Management & Reliability · Calgary, AB

- Proposed and drove a capability-based product team model - grew a fragmented function from 3 to approximately 10 people; designed role definitions, team operating model, and accountability frameworks from blank page
- Led product requirements and future-state design across work management, reliability, and asset lifecycle - in a heavily regulated operational environment where compliance constraints governed every product decision
- Mentored Business Analysts in stakeholder engagement and facilitation, building product capability across the team

Team Lead, Maximo Support

2012 - 2014

- Designed intake, prioritization, and escalation processes; built field operations relationships that transformed platform trust and product adoption

Shell Canada Ltd.

2012 - 2013

Service Operations Management Analyst

- Built KPI frameworks and performance reporting for service operations; identified improvements contributing ~\$90K in annual cost savings
