PROFESSIONAL SUMMARY

Operational leader with 15+ years building functions that make complex organizations work - program governance, team operating models, accountability frameworks, and cross-functional alignment across large enterprises. Brings a human-centered design lens to operational problems: the best operational infrastructure is the one people actually use, designed around how work naturally flows. Applies design heuristics in product decisions; most recent personal product work is specifically designed to eliminate administrative friction through cognitive load reduction. At TC Energy, built the Product Management function from blank page - operating model, career ladder, intake governance - and elevated PM credibility with VP and GM-level leadership. At AltaGas, owns portfolio governance spanning eight capability domains and four subsidiaries, designed around the decision rights and operating cadence that real stakeholder groups will actually adopt. Holds a BSc in Computer Science.

CORE COMPETENCIES

Operational Function Design & Governance Frameworks

Human-Centered Design & Design Heuristics

Program Management & Cross-Functional Delivery Leadership

Team Development, Coaching & Organizational Model Design

Executive Stakeholder Alignment (VP / GM / C-Suite / SteerCo)

Investment Prioritization & Business Case Development (ROI, NPV)

Product Adoption Metrics & Performance Reporting

Agile / Scrum Delivery Across Multiple Workstreams

Azure DevOps | Power BI | Power Apps | SAP | Maximo / MAS

WORK EXPERIENCE

AltaGas Ltd.

April 2025 - Present

Lead, Business Solutions | Program & Portfolio Operations · Calgary, AB

- Owns operational governance across eight enterprise capability domains across AltaGas, WGL, Semco Energy, and Petrogas - Work Management, Asset Lifecycle, Supply Chain, **Health Safety & Environment**, Planning & Scheduling, Reliability & Maintenance, and more
- Designed a three-tier governance structure (Strategic Leadership Council, Program Leadership Council, Technical Advisory Council) with defined decision rights and operating cadence - built around how each stakeholder group actually works, not an idealized governance model
- Built and presented the business case for governance restructuring to executive leadership - connecting delivery capacity gaps, technical debt, and platform adoption risk to measurable enterprise risk; secured organizational commitment
- Led a cross-functional delivery team through tripled demand and halved capacity - maintained delivery quality and roadmap discipline through structured intake governance and transparent prioritization
- Defined platform adoption metrics and portfolio health reporting to executive leadership - linking underperformance to root causes requiring investment response

TC Energy

August 2021 - September 2024

Liquids Portfolio Product Manager | Program Governance & Organizational Development · Calgary, AB

- Built the Product Management function from blank page - defined the operating model, PM career ladder, intake governance, and the organizational credibility that comes from a PM function that visibly delivers; developed and influenced 11 Product Managers; elevated the function with VP and GM-level leadership
- Designed an investment governance framework from scratch - defined intake SLAs, prioritization criteria, business case standards, funding thresholds, escalation paths, and reporting cadences; gave the organization its first consistent visibility from demand intake through funded execution
- Built a behavioral analytics model on product adoption data - discovered that zero-ticket areas reflected access barriers and systemic distrust rather than healthy adoption; findings changed how IT leadership measured platform health; a human-centered analysis of how users actually engaged with products
- Served as Application Stream Lead on the TC Energy / Southbow spinoff - rationalized 2,000+ applications for a 10,000-person organization resized to 600 people; evaluated architecture options and recommended migration path; recommendation accepted as company direction
- Partnered with Directors, General Managers, and Vice Presidents across five functions to align competing investments against strategic objectives and resource constraints

222529 Alberta Inc. (Independent Consulting)

November 2019 - August 2021

Director, Business Analysis | Digital Transformation Programs · Calgary, AB

- Built portfolio intake and evaluation frameworks for digital transformation investments across a \$14M portfolio - prioritization models, business case standards, and governance criteria
- Facilitated alignment between operational stakeholders and technical delivery teams - defining scope, success criteria, and cross-functional ownership before programs launched

Keyera Corporation

July 2014 - November 2019

Senior Business Analyst / Program Lead | Enterprise Asset Management & Reliability · Calgary, AB

- Proposed a capability-based organizational model when fragmented ownership was slowing delivery - brought together Business Analysts, Functional Analysts, and Technical Analysts into a unified function; team grew from 3 to approximately 10 people
- Designed role definitions, team operating model, and accountability frameworks - establishing how demand entered the function and how outcomes were measured
- Mentored practitioners in stakeholder engagement and requirements elicitation; led requirements and process design across work management, reliability, and asset lifecycle

Team Lead, Maximo Support

2012 - 2014

- Designed intake, prioritization, and escalation processes; built field operations relationships that transformed platform trust and adoption

Shell Canada Ltd.

2012 - 2013

Service Operations Management Analyst

- Built KPI frameworks and performance reporting for service operations; identified improvements contributing ~\$90K in annual cost savings

EDUCATION

Bachelor of Science, Computer Science

University of Manitoba

Certificate, Product Management
